iHEPS

iSCADA Hosted Energy Profiling Services

" Intelligent Energy Monitoring System for
Corporate Office Building, Manufacturing Factory, and University "

DEVICES WORLD

**We are pioneer and leader in Hosted Data Acquisition**

We are more than SCADA - **S**upervisory **C**ontrol **a**nd **D**ata **A**cquisition

Everything here is Internet-based, we are *i*SCADA

*i*SCADA turns your data into informative dashboards and reports that are easily to understand, and fully customizable.

Dashboarding allows you to tell the story of your energy consumption and resolve any inefficiencies in your business' usage.

With *iSCADA* monitoring solutions, *iHEPS* can give you instant feedback on your actual energy use at any moment in time and determine whether the existing electricity is being consumed in an efficient manner

The Challenge

Utility consumption (Electricity) is one of the largest factors affecting your profitability and competitiveness. Nowadays, high utility costs are one of the many challenges facing Malaysia's small and medium enterprises as they seek to expand and drive the economy.
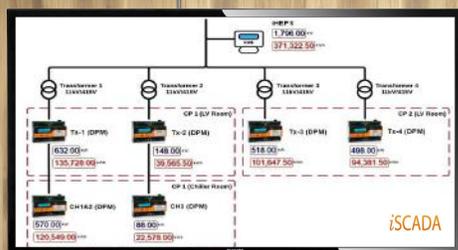

Diagram on right shows the typical set up of incoming TNB Supply

We are Cloud-based

*i*SCADA uses cloud computing to provide analytical data to users, at anytime, from anywhere. The cloud allows users to access and understand the energy usage of your facilities real-time, 24/7, from the comfort of your office or home, requiring only an internet connection and web browser.
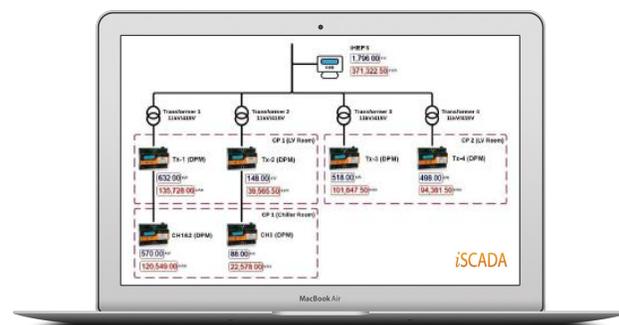

Public Display function is always active

An effective tool to give your employees and/or your clients a good view of your consumption pattern to make sure energy is being used. Now, they can be completely educated on your company's consumption patterns and costs with this spectacular live view portal.

This display function is

♦ Accurate, data is provided direct from the utility meter, ensuring data validity

♦ Real-time performance of your energy where eye-catching graphics and animations will draw people in and deliver a positive environmental image and economical image.

Easy to understand content

This interface is easy to understand and engaging, where the layout and the format of content are designed by our specialist for your target audience

*i*HEPS provides real-time data displays, beautiful displayed dashboard interface for your monitoring.

"This Public Displays place itself at public areas such as office receptions and lobbies to demonstrate beautiful data and graphs to all"

4 Benefits Why You Should Implement *iHEPS* On Your Facility Building

Monitor data from anywhere, anytime

With *iHEPS*, you can monitor and control virtually anything from anywhere in the world. Now you can see all information in just a few clicks, by using your own laptop or desktop computer with internet connection.

Up-to-date data

iHEPS gives you the real-time, interactive and highly accurate data you need

From here, you will be able to know exactly where your energy is spent, and this will assist you in deciding on where to minimize wastage and save cost.

Reliable & Affordable

Based in the Cloud, *iSCADA*- combines traditional SCADA technology with web-based services to deliver cost-effective and efficient solutions, removing the cost of installing multiple RTUs, meters, and control rooms. With *iHEPS*, we deliver real-time energy consumption information to help you achieve energy efficiency with NO investment cost on metering equipment.

Personalize the data you needed

Your account is completely tailored by our experienced specialist, which is 100% protected by our proprietary encryption technology.

Our alerting system will notify you based on your preference. Configure alerts to your specifications and levels of importance (etc. in the event of High KW consumption).

*i*HEPS

YOUR *i*SCADA SOLUTION TO THE FUTURE AND BEYOND

✓ **Simple to Install**

Its sensors and meters are fully non-invasive. **iSCADA** simply latches on to your facility's standard meters or any compatible monitoring infrastructure that your building is already equipped with. All you need to have is a desktop computer or laptop with internet connection, then you can study your data here without any software or server needed

✓ **Service and Support**

We have a team of experienced technical profession for any technical matters

Email address: **support@iscada.my**

✓ ***i*HEPS Customers**

Devices World was founded in 2000 as a developer of *i*SCADA.
We help our customers resolve inefficiencies issues, monitor their facilities, and strive to perform advance solutions by intensive research and development. Our technology is a pioneer of internet based monitoring and is focus on bringing SCADA applications to the masses.
